

# THE BLAIRMORE ENTERPRISE

VOL. XIV, NO. 11.

BLAIRMORE, ALBERTA, THURSDAY, MARCH 15, 1923.

\$2.00 YEARLY

The members of the Blaimore amateur hockey team and officials of the club that accompanied them to Vancouver, speak very highly of the manner in which they were entertained by our former townsman, Michel Rosse, now proprietor of the Mike American hotel there. From the time cross over to the island, or the boys' arrival till their departure, might have toured the island as well.

## OPERATORS AND MEN AGREE TO EXISTING CONTRACT

The conference of miners and operators which has been in session at Calgary for about a week, arrived at terms yesterday, whereby the existing agreement is extended for another year.

All the conditions and terms of the contract have been accepted for one year from March 31st next. This definitely disposes of any danger of cessation of operations at the conclusion of the present agreement.

In various circles the action taken by the operators has come with a certain amount of surprise in view of the fact that the renewal of the contract carries with it the high peak war wages.

Blaimore's hockey moguls and Alberta Amateur Champions, returned from Vancouver via Calgary, last week end. The boys show the effects of the unfair usage received at the coast, but felt satisfied that the B. C. politicians were not in a position to claim an honorable win.

United States newspaper headlines; Bastrop, La., "Hooded Mob Crushed Victims with Deadly Machines." "Florida Mob Slays its Seventh Victim." Government officials too busy with Volstead Act to look after murderers. Signs of the times!

A number of local Oddfellows went to Coleman on Monday night last and indulged in a hockey game, which was won by the Coleman lodge by a 5-3 (or some such) score. After the game the visitors assisted in degree work, after which an excellent supper was served and enjoyed by all. The Coleman lodge expect to return the visit in a few weeks.

## MAYOR WILL ATTEND MUNICIPALITIES CONVENTION

The regular meeting of the town council was held on Monday night. Mayor McLeod, Councillors J. Angus McDonald, Owen Morgan, J. A. McDonald, W. Peterson and Evan Morgan being present.

The minutes of previous regular meeting and of a special meeting were approved as read and the following accounts were duly passed for payment: Postage \$5.00, West Canadian Collieries \$321.00. Account of Dr. Olivier was also given consideration.

A communication was received from the residents of Beaver Creek district, asking the support of the Council to their efforts to get a bridge built crossing Castle River at a point directly south of Fir Grove Ranch. This bridge would connect up a new road partly graded last year that will allow practically a direct route to Beaver Creek, cutting the distance about eight miles shorter than the present route, and as the residents of the Beaver Creek district looked to the Crows' Nest Pass for a market for most of their farm products, the Council felt they were duty bound to endorse the proposition.

A letter was received from the court house contractors — Messrs. Watson & Abercrombie, Calgary — addressed to the mayor and advising that work had been temporarily suspended through an order from the government.

A communication from the secretary of the Union of Alberta Municipalities was received, announcing the next convention to be held in Edmonton on March 22nd and 23rd, requesting that the town be represented by a delegation. On motion by Councillors Owen Morgan and J. Angus McDonald, Mayor McLeod was delegated to attend that convention.

Some of the resolutions passed at the last convention were as follows:

**Educational Poll Tax**  
"WHEREAS under certain Acts of the Province of Alberta the imposition of a Poll Tax for educational purposes is provided for, but is optional, thus causing much difficulty in making collect on thereof;

"AND WHEREAS it is deemed advisable that such Poll Tax be imposed;

"THEREFORE BE IT RESOLVED that the Legislature be asked to amend the Acts so as to impose a Poll Tax for school purposes assessed upon all persons not otherwise assessed for school purposes and that said tax shall be not less than \$4.00 and not more than \$10.00."

**Children's Aid Societies**  
"WHEREAS considerable ambiguity exists as to the relative status of authority as between the Children's Aid Societies and Municipal Councils in regard to the administration of affairs as affecting the public maintenance, protection and education of delinquents or neglected children;

"BE IT RESOLVED that the Union of Alberta Municipalities in convention assembled go on record in favor of having the government of the Province of Alberta amend the existing provincial enactment to provide that at the option of any municipality so desiring, children's aid work in said municipality be placed under the direct control of the council, with the Children's Aid Society acting in the capacity of an advisory body, such option to be exercised by the council passing a resolution expressing its decision to have the children's aid work taken over as a department of the municipality."

**Relief of Indigents, Etc.**  
"WHEREAS the financial burdens of the urban municipalities are in nearly all cases throughout the province as much as the ratepayers are able to cope with;

"THEREFORE BE IT RESOLVED that this convention of the Union of Alberta Municipalities respectfully request the government of the Province of Alberta to amend the Act dealing with the relief of indigents and also that dealing with Mothers' allowances, so that it would take twelve months' residence to qualify as a citizen of any municipality and that all responsibility for indigents and widows' pensions be placed upon the provincial government."

**Foreign Companies**  
"WHEREAS under Section 18 of Chapter 63, foreign companies registered in the Province are exempt from the payment of license fees when selling goods to the public generally;

"AND WHEREAS such exemptions subject local tradesmen to serious hardship in that they are, as a rule, heavy taxpayers and because of this competition (which they are unable to meet for obvious reasons) suffer considerable losses;

"AND WHEREAS the increased burden of taxation in all urban municipalities makes the collection of revenue from every possible source imperative in order that a reduction in direct taxes may be effected;

"AND WHEREAS this is a source from which considerable revenue might be derived;

"THEREFORE BE IT RESOLVED that the legislature be asked at its next session to repeal said Section 18 and thereby give urban municipalities power to impose a license fee on foreign companies selling to the public within the municipality."

We understand that at the approaching convention many resolutions of similar or even greater importance will be considered, some of which will have Mayor McLeod's endorsement.

## UNION CHURCH LADIES TO HOLD TEA AND SALE ON 29TH

The ladies of the Sewing Circle of the Union church met at the church on Wednesday, March 7th, at 2:30 p.m., and plans were made for a sale of home cooking, Easter lilies, and plants. The sale will be held in the I.O.O.F. hall on March the 29th at 3 p.m. There will also be a table of fancy articles and afternoon tea will be served. Everyone is invited to visit the hall on the 29th. Anyone desiring to order special plants can do so by phoning their order to Mrs. F. M. Pinkney, Phone 160.

A pleasant half hour was spent over the teacups after the business, Mrs. E. Elliott and Mrs. T. Dawson being the hostesses.

Next meeting will be held in the church on the afternoon of April the 4th. All ladies welcome.

portance will be considered, some of which will have Mayor McLeod's endorsement.

On motion, G. F. Johnson, of Fernie, was engaged as auditor for the ensuing year.

The question of appointing a fire chief occupied the time of the council towards the close of the meeting. Councillor J. Angus McDonald named W. Lornie for the position, feeling that for such a post a man who would be around town at any time during the twenty-four hours was desirable. Councillor J. A. McDonald registered opposition on the grounds that Lornie was already an employee of the town and that there were ratepayers who should be given a chance for the position. The allowance made several years ago was \$100 per year, but of late years the town has not had a fire chief drawing stipend. The matter was laid over till next meeting.

## Set a Goal

Your success depends not so much on how much you earn as on what you do with your money. Keep track of your expenditures. Resolve that a year from now you will have saved a certain sum. With non-savers it becomes harder to save as time goes on. Get the saving habit now.

"Double your Savings; It CAN be Done."

## RICH IN VITAMINES

MAKE PERFECT BREAD

## WORLD HAPPENINGS BRIEFLY TOLD

Work has started at Vancouver on the new 500,000-bushel grain elevator. Out of the 12,502,582 children between 10 and 15 years of age in the U.S., 1,000,658, or one in every 12, are at work.

Said to have been the oldest man in the Eastern Townships, Etienne Bonneau, 107 years old, died at St. Hyacinthe, Que. His youngest son is 79.

The French Ministry of Labor publishes figures showing that generally the cost of living in France is now three times as much as in 1914.

The British Columbia Government's \$2,500,000 fund of reclaiming and opening to settlement the rich lake-bottom lands of Sunnis, in the Fraser Valley, over an area of five to 14 miles, will be completed by May 1.

The title of "royal" has been conferred by the King upon the Canadian Air Force, according to an announcement by the Department of National Defence. This service will according to be known in future as the Royal Canadian Air Force.

The Frankfurter Zeitung states that in 1922 Germany delivered to Jugoslavia on account of reparations 3,853 closed railway trucks, 150 oil cisterns, 2 complete railway workshops and 331 normal-gauge and 39 narrow-gauge locomotives.

Internally and Externally it is Good. The crowning property of Dr. Thomas' Elettiric Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pains in the chest, colds and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

## Big Oil Refinery

The \$2,500,000 refinery of the Imperial Oil, Limited, which is under construction in Calgary, will be in operation by the end of 1923, according to a reported statement by C. O. Stillman, President of the concern.

## More Irrigated Land

Large Area of Irrigated Land Will be Added this Spring

Water will be available in the spring on two of the irrigation projects in southern Alberta, namely the Little Bow and Northern and the United, according to the annual report of the Irrigation Council of the province of Alberta. Considerable work is now being done towards colonizing the surplus lands in these districts. A total of 40,000 acres of land has been listed at prices ranging from \$15 to \$50 an acre. The council has a mailing list of 8,000 in its colonization work, and have already received more than 400 inquiries for land. Twenty prospective settlers have been shown over the projects.

## Relieved after Nine Years of Suffering

Manitoba Man Finds Secret of Health in Dodd's Kidney Pills

Mr. P. R. Bolestin wants Everyone to Know what Benefit he Received from Dodd's Kidney Pills. "La Broquerie, Man. (Special).—Before taking Dodd's Kidney Pills I was in a completely relieved of my kidney trouble." These are the words of Mr. P. R. Bolestin, well-known and highly respected here.

"I have suffered for nine years and tried all kinds of remedies. It was Dodd's Kidney Pills that restored me to good health. I am now able to get about on the farm, have a good appetite and sleep well."

Dodd's Kidney Pills strengthen the kidneys and put them in shape to do their full work of straining the impurities out of the blood. With pure blood there is good health all over the body.

If you have not used Dodd's Kidney Pills for kidney trouble ask your neighbors about them.

## Gold Smuggled In Soap

Shopkeeper Bought Valuable Shipment At Auction

Gold has been so scarce in Australia that all sorts of devices have been tried to get the precious metal into that country, the latest being smuggling it in soap. How the project failed is told in the following incident:

A widow in Budapest, after purchasing a cake of soap from a little shop nearby, began to rub the garments in her tub. After a time she came to a surprisingly hard centre—a gold crown piece.

Without delay she returned to the shop and purchased more cakes of the wonderful soap. Every one yielded a gold piece.

She organized a pool among her neighbors with the idea of clearing the shop of that particular brand of soap. But the secret was out. The police arrived and confiscated the stock.

It was discovered that originally the consignment had been dispatched from Budapest to a merchant in Vienna.

An error had occurred in the bill of lading. The soap, put off at a way-side station, was unclaimed and finally auctioned.

The entire shipment, worth £200,000, had been bought for a trifling sum by the shopkeeper.

## Many Foreigners Naturalized

Men of every nationality secured status of citizens of Canada during the fiscal year ending March 31, 1922. Altogether 10,360 foreigners were naturalized. Americans with 2,936 and Russians with 2,060, led in the number of persons who became naturalized Canadians.

## Constipation and Sluggish Liver

Don't take chances. Get Carter's Little Liver Pills right now. They never fail to make the liver do its duty. They relieve constipation, drive out bile, clear the complexion, stop dizziness, clear the complexion, put a healthy glow on the cheek and sparkle in the eye. Be sure and get the genuine.

Small Pill—Small Dose—Small Price

## Canada Broadening Out

Limitless Possibilities of the Dominion Becoming More Generally Known

There is no thin strip of Ontario and Quebec separated by a desolate waste from the prairies. No longer are the prairies a narrow ribbon of land separated from British Columbia by mountains so high that freight cannot be carried over them. Instead we have Quebec pushing its settlements up the northern valleys and its industries into Labrador; Ontario extending local railways to the waters of Hudson Bay, and finding gold and silver mines on the way, at the same time creating a new Ontario towards Manitoba.

Prairie lands available for culture are two or three times the breadth north and south that the despairing critics of other days supposed. British Columbia, more than any of the other provinces, is finding wealth in her northland. Farming, fishing, lumbering and mining are working their way north. In this province, in Alberta, in Manitoba, and in Ontario the cry for railways comes mainly from the north.—Vancouver Province.

## HAD BAD PAINS IN HER HEART

## Nerves Were Very Bad

Mrs. John Case, R. R. No. 4, St. Catharines, Ont., writes:—"I wish to say that I have been bothered very much with my heart and nerves. I doctored with two different doctors, but did not find much relief. I would have such bad pains in my heart, at times I would be almost afraid to move or breathe, and at night I could not sleep. If the pains in my heart were gone, my nerves would be so bad I could not lie still and would only get a little sleep by being tired out. My stomach was also very bad and I could eat but very little, and then only certain things or I would have the most distressing which always made by heart worse."

I had been suffering for nearly two years until the way I was talking to our druggist about the way I felt. He advised me to use Milburn's Heart and Nerve Pills a fair trial. I have now taken five boxes and am feeling so much better. I am able to do my own work, and can eat anything I wish. I cannot praise

MILBURN'S HEART AND NERVE PILLS

too highly. Price: See a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

It is asserted that the existence of cancer and tuberculosis in large numbers has been definitely established, and that these discoveries may direct the attention of investigators of these diseases to the earlier form of life that still exist in the sea.

## A Marvellous Instrument

Machines Give Record on Chart of Strains in Steel

To the lay mind it might seem impossible to devise any means of measuring microscopic strains in steel and other materials. There have been, however, various instruments designed in Great Britain to record strains of the most minute character—mere tremors in the material. A notable improvement in this field has recently been introduced by a leading British firm—their machine, unlike earlier types, giving a direct record on a chart of the strains and not depending upon photographs. The mechanism is driven by a clock movement, and does not need any battery or electric pump. So accurate is the instrument that it will register vibrations taking place at over one thousand times per second. Records are made by a pen on a tape and are examined under a simple microscope. The chief use for this "instrument" is in measuring the various stresses which arise in bridges when trains are crossing at various speeds.

## Increase in Building

Figures recently issued by the Canadian Government Bureau of Statistics show that building permits to the value of \$3,705,356 were issued in Canada during January, of this year, an increase of \$773,221 compared with January, 1922, or 26 per cent. It is expected that there will be great activity in the building trades throughout Canada during the present year.

## WINTER HARD ON BABY

The winter season is a hard one on the baby. He is more or less confined to stuffy, badly ventilated rooms. It is often story that the mother does not get him out in the fresh air as often as she should. He catches colds which rack his little system, his stomach and bowels get out of order and he becomes peevish and cross. To guard against this the mother should keep a box of Baby's Own Tablets in the house. They regulate the stomach and bowels and break up colds. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## Postal Air Routes

Stefansson Predicts Mail Delivery in Arctic By Airplane

The post office department announced a short time ago that a regular mail service will be opened between Fort McMurray, in Northern Alberta, and Akavik, on the delta of the Mackenzie River, the Canadian Arctic's newest post office and trading center. The mails will be carried by five relay of huskies in sleighs, and the postman will be two months in the wilderness each time he makes the trip. It will be under the canopy of heaven, surrounded by his dogs. By day he will mush across the white spaces in a manner that Jack London made famous. But even this last bit of romantic human enterprise is threatened. Mr. Stefansson has already mapped the Arctic with polar routes which he says will come within a few years. So the world moves on.—Winnipeg Tribune.

When a mother detects from the writhings and fretting of a child that worms are troubling it, she can procure a reliable remedy in Miller's Worm Powders which will expel all worms from the system. They may cause vomiting, but this need cause no anxiety, because it is but a manifestation of their thorough work. No worms can long exist where these powders are used.

## Wolf Dogs For Movies

Forty "huskies," or wolf dogs, passed through Edmonton recently on their way to Banff, Alberta, where they will be used by an American motion picture producing company in the filming of a number of northern pictures.

## Dye Faded Wrap, Skirt, Dress in Diamond Dyes

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her old worn, faded things new. Even if she has never dyed before, she can put a rich, lustrous color into shabby skirts, dresses, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything. Buy Diamond Dyes—no other kind than perfect home dyeing is guaranteed. Just tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade, or run.

## Monster Sawfish Caught

A sawfish, weighing two and one-quarter tons has recently been caught in the Bay of Panama. The fish was twenty-nine feet long, and had a girth of sixteen feet.

## Power From Sun's Rays

New York College Graduate Demonstrates Miniature Engine

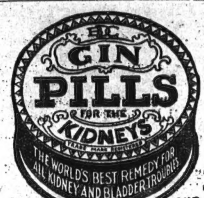

A miniature engine, whose power was generated by the sun's rays, was successfully demonstrated in the laboratory of the college of the city of New York by Bernard Grossman, a graduate.

A parabolic copper mirror caught and focused the rays upon a test tube of water, the heat causing steam, which in turn operated the tiny motor at a high rate of speed.

Grossman said his invention could be used in office buildings to provide light, heat and power, while the sun motor could be utilized to operate motor trucks. He would build a larger model to prove his theory.

## ALBERTA COAL FOR ONTARIO

A strong revival of the effort to place Alberta coal on the Ontario market in competition with American anthracite, and to fill the serious shortage of fuel which has been experienced in that province is being made as a consequence of the discussion which has taken place in the federal parliament in this respect.

During the convention of the mining and metallurgical institute of Canada at Montreal last week, a resolution was passed asking the federal government to appoint a committee of three including a freight expert, a mining engineer and a business executive to report upon the feasibility from all viewpoints of making Alberta coal available to the Ontario market. A delegation of Alberta operators also waited on the Provincial Government on Friday asking that the legislature pass a resolution asking the Dominion Government to make an effort to secure a freight rate on Alberta coal product in Ontario. The Edmonton Board of Trade also passed a resolution along these lines.

It is estimated by A. Chard, provincial supervisor of freight and traffic, that if a \$6 a ton rate on train-laid lots could be provided from mining centres in Alberta to Toronto, this coal could enter competition successfully with the American product. The present rate is \$12.70 a ton, which makes the price of the product in Ontario prohibitive. American bituminous coal, a very inferior coal in quality to Alberta, is selling in Toronto at \$7 a ton. Anthracite is selling at \$18 a ton. If Alberta coal could be put on the market at Toronto at \$13 a ton, it could compete successfully.

The mines now operating in Alberta have a capacity of more than twice their present output, and so would be quite capable of meeting the increased demand. During the past winter, Alberta has successfully supplanted the American product on the Winnipeg market, something for which this province has been struggling for years.

Mrs. Vera and Jeanette Zittle left last night for Calgary, where they enter the Holy Cross hospital to take up nursing.

At the regular fortnightly meeting of Crows' Nest Encampment No. 8, last night, P. C. collars were presented to past guards William and John Patterson. The presentation was made by Past C. P. Montalbetti in an able manner.

If the government or the school board refuse to seriously consider the question of increasing the educational poll tax from \$4 to eight or ten, why not drop the measure altogether and add another mill on the assessment of property holders, none of whom would feel the burden very much.

There is probably no place on earth better than a country newspaper office to learn how many kinds of people there are. Some get huffy if a statement is sent; others will not pay unless they receive one. Some will pay without a statement and others will not pay whether a statement is sent or not. Some thought they owed more, and some thought they didn't owe so much. Some say they couldn't get along without the paper, others say it doesn't amount to much; but the meanest, scrubbier on the list is the man who takes the paper until he is shut off for non-payment and spends all his time explaining how he used to take "the thing."

## MINIMUM WAGE

With respect to certain classes of female employees, the order of the Alberta Minimum Wage Board establishing a minimum weekly wage of \$14 has been suspended, and instead of coming into force on April 1, will not be in force until September 1, according to an announcement by A. C. Broyd, chairman of the board. The classes of employees affected are those in manufacturing establishments, cleaning and dye works, and shops and stores. The order is still effective for April 1, with respect to female employees in hotels, restaurants, rooming houses, personal services and in offices.

In our last issue we referred to the case of John Gekas, of Hillcrest, who was convicted and fined for an offence under the liquor act. We inferred at the same time that Gekas was the licensee of the premises raided by the police on that occasion, but since learn that such was not the case, that others hold the license and that Gekas' conviction may not necessarily affect the license of the premises. Our error in this connection, according to Gekas and Draper, was drawn to their attention by 'Sergeant Scott, of the Alberta Provincial Police Force.

The town council has received word from the government, stating that they were unable at present to pay the monthly allowance of about sixty dollars to the wife and family of the late Paul Thibodeau. This amount becomes payable to the family under the Widowed Mothers' Protection Act. The reason given is "lack of funds." On the other hand it is very interesting to note that a sum of nearly four hundred thousand dollars was being used annually to keep up some forty school inspectors in Alberta. And, again, when any public enterprise requiring expenditure of government funds is undertaken, a large portion of the cost goes into the pockets of co.-job officials, practically unnecessary, while economy is supposed to be practiced in connection with the expenditure of public funds.

Cowley Odeffolles will hold their annual ball in the Tuxton hall on the night of Monday, April the 16th. Band orchestra will furnish music.

Up to the time of going to press, we have heard no reports from the bean supper held by the church ladies at Hillcrest last night.

The Dominion of New Zealand has bought land and houses for its returned soldiers, lent them money for the purchase of farming materials, tools and furniture, provided training for the unskilled and helped in many other ways.

F. W. Ayer, senior member of N. W. Ayer & Son, advertising expert, died at his home near New York on March the 5th of pneumonia. He was the son of N. W. Ayer, who founded the advertising firm which grew to be one of the largest in the world.

If you desire a healthy, attractive Shamrock or Fern for your table, not forgetting a dainty basket of whole-some home-made sweets, come to the tea to be given by the ladies of Crows' Nest Chapter, I.O.O.F., in the I.O.O.F. hall on Saturday March 17, (St. Patrick's) from 2.30 to 5 p.m.

On the recent visit of Col. A. Y. Pouchon to this district, announcement was made that work of construction of the big saw mill near Macleod would be proceeded with as soon as the spring highwaters subside.

Councillor Cunliffe, of Sydney Mines, recently received a Ku Klux Klan letter, signed by the Grand Klugeles, threatening direct action against his person. The letter terminated with the words "Beware of the Hooded Man, vengeance will follow." At the foot of the note was a picture of a heart with a knife through it.

## HOW CURLING WAS STARTED

An American exchange says: Curling at first seems to have been a sort of "quitting on the ice." A stone, rounded by the action of some river, and weighing a few pounds, was used. This stone had a nick for the thumb on one side, and one for the fingers on the other. With a curling sweep from behind the player "quitted" his large pebble, and the slipperiness of the ice carried it to the tee or mark at which it was aimed. The player seeking the allowance for the nature of the surface of the ice in delivering the shot. This initial game was played during the kiltin Stone or Piltreck period of curling.

Following this period came the giant, or boulder age. During this time the curler utilized a huge boulder or block from the river beds. This stone had inserted into it a rough iron handle which aided the player in propelling the huge stone along the ice to the desired goal. During the boulder age the minimum weight of the stone was 60 pounds. It has been established as a historical fact that some stones used actually weighed 200 pounds.

About the middle of the last century the curling stone was found in a more suitable shape. The formation of clubs for the playing of the game had much to do with the stone's improvement. By the end of the century the stones were all rounded more or less but still retained an uncouth appearance. The variety of chiseling was so great that force rather than science ruled the play.

The two most renowned curling clubs of the 18th century were the Canonmills and the Duddingstones.

In the Scottish capital magistrates used to march in procession headed by a band playing "The Currier's March," to open the winter festivals on Nor' Loch, where the Edinburgh curlers played. This was before the game was driven from the Loch to Canonmills. The Loch became the site of the present North British railway station, having been drained dry for city improvements.

The currier's outfit is not costly. He must have a broom or kove to sweep the ice when directed, for sweeping is a most important part of the game.

Curling stones are named after the place where they are procured. Among the well known stones are Crawfordjohn, Burnock Water, Douglas Water, Criel, Carpharlin, Thikernhill and Ailsa Craig. The first named three are popular in Scotland. Those quarried from Ailsa Craig are cut into square blocks before being sent to manufacturers to be rounded and polished. They resist the hardest knocks and excessive frost do not effect them.

In curling, ice is, of course, the most important requisite, and it must be in good condition. Quality is of infinitely more important than quantity.

The town council of Cardston were unanimous in favor of the purchase of motor truck as a means of conveying fire fighting apparatus and will purchase one as soon as finances sufficient are available. Cardston already has a chemical engine of modern design and capacity.

## WHY BABIES CRY

It's often hard to find the trouble—It may be teeth—it may be stomach—but oh! so often it is just a chafed irritated skin on which poor Soap has been used.

The remedy for this is so simple! Hours of suffering—night after night of disturbance—have been avoided by mothers, who have insisted on—Baby's Own Soap. Of course it costs a little more, a very little more, however—than what is often bought and used—but four generations of Canadian Mothers are there to vouch for its purity, for the soothing healing effect on Baby's delicate skin, for the lovely pure flower fragrance it leaves when Baby fresh and clean is taken from his bath.

Don't you think, Madam, it's worth paying the 10c a cake, a little less if you buy a box (6 cakes) which your dealer asks for Baby's Own Soap. Adv.

## LET THE REST OF THE WORLD GO BY

By Phil Carpesen in The Rotarian  
They stood at the curb of a busy street,

'Midst the noiseful traffic and din;  
She with a battered and worn guitar  
And he with an old violin.

Facing the heedless and hurrying crowd

With a sunken and sightless eye,  
And here is the song they passed to the throng—

"Let the rest of the world go by."

Immersed in the gloom of eternal night,  
They stand at the curb and sing,  
While the sombre strum of the old guitar

Joins the sob of the bow and string  
Wistfully waiting and straining ear  
For the clink of the coins that buy  
A roof for their head and a crust of bread—

While the rest of the world goes by.

The music of life is a joyous thing,  
And carols a message of hope,  
But sweeter the cadence of muted string

That is touched by the hands that grope.  
It throbs with emotions rooted in depths

Never plumbed by the seeing eye;  
All dauntless the heart that can sing apart

While the rest of the world goes by.

And now when I rail at my plans that fail,  
And Fate wears a ghastly grin,  
I hark to the strum of that old guitar  
And the wall of that violin.

And the quavering voices whose prayers ascend  
To the throne of God on high,  
And they plead in song to the heedless throng,

While the rest of the world goes by.

Plunkett and Savage are unloading and distributing a car of Blue Goose Oranges here this week.

An appeal to the Supreme Court on behalf of Emilio Piccarilli and Florence Lassandro, now under sentence of death for the murder of Constable Stephen O. Lawton at Coleman, will be argued on Tuesday, April 2nd.

"HAD A NARROW ESCAPE"

"I never realized until a few months ago how risky it is to neglect a cold in the chest. I have always had good health, that a cold either in the head or chest while unpleasant, never gave me any worry. Outside an occasional cold, I had never known for a day or so at all in the chest until last December. One afternoon I got a chill and no matter how hot I got to the stove, I couldn't seem to get warm. This chill was followed by a cold in my chest. As usual I neglected it and it kept getting worse and worse. Finally I had to go to bed and send for the doctor. His examination showed that I had pneumonia and a bad case at that. By careful nursing on the part of my husband, my children and some friends, I managed to pull through, but the doctor told me I had a narrow shave. And here's where my troubles began. While I was now out of danger, I was anything but well. I was still very weak from the effects of the pneumonia. Although I had lots of life and energy before my sickness, I was now worn out and tired all the time. I slept fairly well, more because I was exhausted, but my sleep didn't refresh me because, while I appeared to be asleep, I was conscious most of the time. I had already undermined my health to such an extent that I was a living skeleton. I was getting discouraged as nothing seemed to do me any good. 'Wonder if Carmel wouldn't build you up,' a friend said one day. 'I did me a world of good,' I was completely run down and you can see for yourself how well I look today. Why don't you try it? Thanks to this friend's advice I am in perfect health again, as healthy and full of life and vitality as I have ever been."

Carmel is sold by your druggist, and if you can conscientiously say after you have tried it, that it hasn't done you any good, return the empty bottle to him and he will refund your money. 9-652

In a great many homes in Western Canada RED ROSE TEA has been the only tea used for over 20 years.

## TEA "is good tea"

Be better nourished  
Prevents that  
sinking feeling

### Stop The Little Leaks

A few weeks ago the wheated farmers of the three Prairie Provinces held, in succession, their great annual conventions. At each of these gatherings the subject upon which the minds of all was "Wheat Marketing"—the development of some system whereby the growers of Western wheat could be assured of a larger return for their product.

At the present time the Legislatures of these same three Provinces are in session, and one of the outstanding questions calling for discussion and legislative action is likewise the same, the marketing of wheat. The Dominion Parliament is also in session, and the same all-absorbing topic of wheat marketing is up for discussion and probable action.

Nobody in the West will for one moment question the vital importance of this subject, not alone to the farmers of the West, but to the Canadian people at large, for it is now generally recognized that much of the prosperity of Canada depends upon the prosperity of the Western farmer. Every pair of eyes of the whole Dominion turn westward, and in the banker's board room, the manufacturer's office, the railway executive's office, in store, shop and factory, the question is asked: "What of the Western wheat crop?"

All is not well with Canadian agriculture. This is a fact impressed upon the attention of the Dominion. Economic conditions are not good, either at home or abroad, although, fortunately, they are gradually improving. But the fact cannot be ignored that the growth of wheat in Western Canada is not prosperous; is not in receipt of a reasonable profit on its investment and labor; in all too many instances is in receipt of no profit at all, but is, and has been, actually operating at a loss.

It is, therefore, of the utmost importance, primarily to the farmer, but also directly to every man, woman and child in the Dominion, that an improvement in agricultural conditions and economies be brought about without further delay. That the costs of marketing are too high, that present methods of marketing are unscientific, that too great a toll is levied on the grain in getting it to the consuming markets of the world, are facts generally admitted; hence the almost universal demand for the introduction of some new system of control and direction in grain marketing.

That something in this direction needs to be effected goes without saying, but at the same time, there is no danger in too great a focusing of attention on the attempt to find one remedy for a great leak, and an ignoring of other and smaller leaks but which, in the aggregate, may mean quite as serious a loss.

For instance, official records have established the fact that during the last shipping season, hundreds of bushels of wheat seeds were hauled by the railways from the prairies to the lake port terminals. Last season's wheat graded uniformly high, but it was also remarkable for the quantity of weed seeds contained in shipments. If not only cost money to clean all this grain, but the farmers of the West paid thousands of dollars in freight charges on this enormous quantity of weed seeds. Surely this is a leak in profits which could, and should, be stopped.

It costs just as much to sow and harrow and drill an acre of land sown with inferior seed as it does to perform the same operations preliminary to sowing the best seed obtainable. There is a difference in the price of the seed itself, and that is all. Later on it costs just the same to cut the standing crop on that acre irrespective of the fact whether it is all grain or partly grain and partly weeds.

The cost of preparing an acre of land, and sowing it to crop, that yields twenty-five or thirty bushels of wheat is but little more than the cost of sowing inferior methods and poor seed which results in only ten or fifteen bushels. A farmer will just as easily and economically cut a standing field of grain with large and well filled heads as will one of small heads and shriveled kernels. But what a difference there is in the financial returns to the farmer from the larger yield per acre.

Despite high costs of production last season, excessive marketing costs, and unsatisfactory marketing methods, some farmers made money last year, while others lost money. The ones who made money were those who had the heavy yields per acre. Weather conditions are, of course, always a factor because no matter how painstaking a farmer may be, or how good and clean the seed sown, there must be a sufficiency of moisture to ensure a crop. But things being equal the good farmer, sowing clean seed, will obtain results in larger yields and, consequently, larger financial returns than the farmer who sows inferior seed.

While, therefore, working for better marketing conditions, the individual Western farmer will be wise in his day and generation who farms well, sows only good, clean seed, and sows unmixing seed on weeks. No matter how favorable the growing and ripening season may be, the maximum results cannot be obtained unless a first beginning is made, and the foundation of a good crop is good seed, just as truly as the foundation of a good herd is to be found in making a start with pure-bred stock.

Do not overlook the little leaks—which are not so little after all—while giving so much, and necessary, attention to the big features of the problem.

1922 Dominion Income Tax \$55,517,222  
Montreal paid the largest amount of income tax during the fiscal year to December 31, the amount being \$18,135,770. Toronto came next with \$14,742,770 and Winnipeg third with \$11,019,239. The total collected income tax throughout the Dominion in the same period was \$55,517,222.

A ton of water from the Atlantic, evaporated, yields 51 pounds of salt, a ton of Pacific water, 79 pounds; a ton of Dead Sea water, 181 pounds.

Anyway, the average woman knows about as much about things political as the average man knows about caring for a baby.

## "My Hands Trembled and I Could Not Sleep"

Mr. Thomas Honey, Brantford, Ont., writes—

"When I began taking Dr. Chase's Nerve Food, I was so nervous that when I picked up a cup of tea my hand would tremble like a leaf. I could not sleep well, could not remember things, and there were neuralgic pains through my body. After taking seven boxes of Dr. Chase's Nerve Food, however, I am in perfect health."

**DR. CHASE'S NERVE FOOD**

50 cents a box, all dealers or Edmondson, Bates & Co., Ltd., Toronto.

### Bought Canadian Paper

U.S. the Largest Customer for Supplies

Newspaper

Newspaper paper exported from Canada during January, 1922, amounted to 1,655,783 cwt., and was valued at \$6,138,827, slightly less than was reported in December. In January of last year the quantity exported was 1,554,924 cwt. The United States was the largest customer by far for newspaper last January, taking 1,333,333 cwt. New Zealand took 288,111 cwt. and Australia 2,881 cwt. Smaller quantities went to British West Indies and South America. Australia was Canada's largest customer for book and writing paper, taking 288,000 cwt. of a total of 720 cwt. The United Kingdom and Australia imported most of the 12,373 cwt. of book paper exported in January. The United Kingdom took 2,706 cwt. and Australia 4,320 cwt. Newfoundland and St. John's were the next best customers for book and writing paper.

## The King And Queen Break Precedents In Dining With Laborites

London.—The King and Queen, for the first time in their lives, broke bread with the Labor members of Parliament in the home of one of their subjects.

The occasion was a dinner given by Viscount and Lady Astor, at which Their Majesties met, among others, James Henry Thomas, General Secretary of the National Union of Railwaymen; John Robert Clynes, President of the National Union of General Workers, and former Labor leader in the House; and Philip Snowden, and their wives.

Labor came in eleven knee breeches, which was jocosely described as a concession, and there were also present those who wear the cherished garter—Balfour, Salisbury and Grey of Faloudes.

The affair, which was unique in British social history, was arranged as much to permit the King and Queen to meet in social intercourse with the Laborites as to allow the Laborites to come into social contact with Their Majesties. It was said the King had made known his desire to meet the leaders of the Labor party in such manner.

Lady Astor, whose campaign for political honors was characterized by much banter, greeted the Labor guests when they appeared in knee breeches with joking remarks. She whispered "pull up your stockings" in the ear of Mr. Thomas, and even inquired of the Canadian High Commissioner, Hon. P. C. Larkin, if his stockings were on straight.

The guests sat at two large round tables, amid the fragrance of pink tulips and other blossoms. The diners included, in addition to those mentioned, Premier Bonar Law, the Marquis and Marchioness of Salisbury, the Speaker and Mrs. Whitley, Lady Frances Balfour, Lord and Lady Eustace Percy, Viscount and Lady Grey of Fallodon, Lord Robert Cecil, Lord and Lady Islington, Dame Lytton, Mrs. Lloyd George, Sir John and Lady Simon, the Lord Mayor and Lady Mayoress of Plymouth, Col. and Mrs. Spencer-Clay, and Mrs. Margaret Winttingham, M.P.

### Aged Woman Sent to Prison

Portage la Prairie.—Found guilty by a jury of attempting to murder her husband, James Campbell, by poisoning his food, Mrs. Maria Campbell, aged 70 years, was sentenced by Justice Adamson to serve four years in Stony Mountain Penitentiary.

## Still Hope That Turk Peace Agreement Will Be Possible

Constantinople.—Turkey's rejection of the Lausanne peace treaty, which was not unexpected, has been received calmly in both England and native circles in Constantinople. The belief persists that it is still possible to reach a middle ground agreement towards peace.

The Angora Government will now proceed to draft a reply to the Allies.

### Constipation Banished

A druggist says: "For nearly thirty years I have recommended the Extract of Roots, known as **Heiler's Cerebral Syrup**, for treating constipation and indigestion. It is an old reliable remedy that never fails to do the work. 30 drops three times daily. Get the Genuine. 50c and \$1.00 bottles."

## CROWN BRAND CORN SYRUP

makes a crowning sauce for Blanc Mange and Baked Apples and Puddings.

It is a pure and wholesome sweet—whether used for table syrup, sauce or candy making.

### Britishers Going to U.S.

More Going to States than to All British Dominions Combined

London.—If the flood of English emigration to the United States continues at the present rate, Great Britain's quota under the United States law will be reached long before July 1, the end of the fiscal emigration year.

Contrary to the general impression, it is learned that Britishers are going to the United States at a rate almost never equaled and there is room for only 25,000 more in this year's quota.

Emigrants are leaving Glasgow alone at a rate of more than 500 weekly, which is greater than the number from all other English ports combined last year. The annual quota for Great Britain now is 77,843. To show the increase in emigration since January 1, it is only necessary to state that only 848 persons sailed in the first week in January, whereas in the last week of February the departures numbered 1,973. According to emigration statistics, more Britishers are going to the United States than to all the British dominions combined.

### Another Use For X-Ray

May Prove Valuable in Treatment for Whooping Cough

Boston.—Belief that the X-ray may prove of more value in the treatment of whooping cough than any other form of treatment is expressed by Dr. Henry I. Bowditch and Dr. Ralph B. Leonard in a preliminary report on their experiments to find a cure for the complaint that has baffled all treatment.

Their report which was published in the Boston Medical and Surgical Journal said that definite improvement was noted in most of 36 cases of acute pertussis (whooping cough) treated with the X-ray, the subjects of which ranged in age from three months to four years with disease stages from one to ten weeks.

### New Anaesthetic Discovered

Persons Under Influence Become Conscious Immediately by Use of Oxygen

Chicago.—Discovery of an anaesthetic pronounced by some experts to be superior to any known drug producing anaesthesia is claimed by Dr. A. B. Lockhardt, Associate Professor of Physiology at the University of Chicago, and J. P. Carter.

The new gas is said to utilize properties of ethylene gas, and to have many advantages over nitrous oxide, "the laughing gas" now commonly in use. Supporters of Dr. Lockhardt's discovery said that it has no effect on the heart action, minimizes danger of pneumonia from the use of "laughing gas" and persons under its influence can be returned to consciousness immediately by the administration of oxygen.

### Fenian Raid Veteran

Vancouver, B.C.—James Sturgeon, 83, veteran of the Crimean war, the Fenian Raid, the Red River Rebellion and the South African war, is dead here. He enlisted in 1853 in the British army and served with the 47th Regiment as a bugler in the Crimea. He was but 13 years old then. In Canada he served with the 44th and 1st Ontario Rifles, and was in the Fenian Raid and the Red River Rebellion. He was with the Canadian Mounted Rifles in South Africa, winning three medals in that campaign.

### Railway Accident Toll

Ottawa.—Sixteen people were killed and 256 injured, in 258 railway accidents reported to the Railway Commission in February. The casualties included one passenger killed and 93 injured, 10 employees killed and 203 injured, and 5 other persons killed and 19 injured.

W. N. U. 1468

### SAPPHIRE FIND IN B.C.

STONES RESEMBLING BRAZILIAN DIAMONDS BRING HIGH PRICE

Vancouver.—A bed of diamonds equal in purity to Brazilian diamonds, and varying in size from one to three carats, has been discovered by Harry W. Oakley, of Campbell River, B.C., who says his find was made halfway between Cumberland and Courtenay.

The stone, of which he has picked up 45 within the last six months, have been pronounced by experts in Portland Ore., as sapphires, but so nearly white that they resemble Brazilian diamonds. Mr. Oakley has sold several of the stones at \$25 a carat.

### Turks Say Lausanne Treaty Inacceptable

Willing to Continue Negotiations Under Certain Conditions

Constantinople.—Advisers from Angora state that the Turkish National Assembly has decided that the Lausanne treaty is inacceptable, being contrary to the National pact.

The Government, however, was authorized by the National Assembly to continue negotiations under certain conditions. The first of these provides for the settlement within a limited period of the Mosul question. The second condition is that all financial and administrative questions be settled in conformity with the complete independence of the Turkish nation. In the third place, the evacuation of all occupied territories immediately after the signature of peace is demanded.

### Alberta Liquor Export

Export Except By Brewers and Distillers Prohibited After March 15

Ottawa.—The export of intoxicating liquors from the province of Alberta, except by brewers and distillers licensed by the Dominion, is forbidden after the fifteenth of the present month.

A proclamation containing the prohibition has been issued by the Governor-General. This proclamation is based on the Act passed last session which provided for the prohibition of export except by distillers and brewers from a province in which import was prohibited and which by order-in-council required the prohibition of export.

### Relief For Farmers

Alberta Committee Deal With Common Problems

Calgary.—Organization of a permanent committee, representative of all business, farming and financial interests in Alberta, to deal with common problems, and demands for legislation drastically changing present relief methods, to embrace the administration of financial aid in individual cases to farmers all over Alberta, struggling under heavy loads of indebtedness, were the outstanding results of the farmers' debt conference here. Repeal of the Southern Alberta Drought Relief Act was demanded, and it was asked that legislation be instituted to place fully protecting the individual debtor and his creditors, at the same time avoiding any appearance of blanket protection of a moratorium.

### Objective Assured For Grain Shipments

Nearly Fourteen Million Bushels Already Shipped From Vancouver

Vancouver.—Vancouver as a grain port has gone over the top, and is assured of achieving the 15,000,000 bushel objective set for the 1922-23 crop year, according to the statistics issued at the Vancouver Merchants' Exchange.

To date, 11,973,942 bushels of grain have been actually shipped from the port during the present crop year. Bookings recorded on the exchange provide for the shipment of 3,199,887 bushels more.

Grain men are predicting that Vancouver's total shipment of grain for the year will approximate 20,000,000 bushels.

### B.C. Mine Exhibit

Victoria.—A exhibit of the mineral wealth of British Columbia will be made at the forthcoming British Empire Exhibition to be held in London, England, next year, according to Hon. William Sloan, Minister of Mines.

MURINE FOR YOUR EYES

## Federal Government Will Assist In Solving Marketing Problems

OTTAWA.—Whether the committee to investigate the marketing of agricultural products will inquire into the grain trade, or whether it should be done by a Royal Commission, will be the subject of advice from the Department of Justice as a result of the initial meeting of the committee. Most of the western members favor the commission plan, and to it the Government is now quite agreeable, but it does not wish to have history repeated—an inquiry started and then arrested by process of injunction.

If the Justice Department finds any way of advising a commission of inquiry without the hazard of an injunction process, that form will be followed. It is anticipated, however, that, as was the case with the Wheat Board, a certain amount of federal and provincial co-operation will be necessary to secure the fullest form of commission inquiry. If this is not possible, the committee will go into it, though the job is recognized as so onerous that it is not especially relished. Moreover, there are plenty of other subjects connecting with farm product marketing to be taken up.

With the cattle embargo being removed, livestock shippers are encountering the same difficulty in getting space for cattle as used to be encountered by farmers some years ago in securing cars for their grain. It is found that many of the companies have the letting of cargo space in the hands of brokers. There is no tribunal over the steamships, which arbitrarily can allow space as they please. In view of this fact it is very probable that any continuance of difficulty in securing cattle accommodation will induce the Government to put into the service of this trade a number of the ships of the Merchant Marine, which can be adapted without much difficulty.

Elevator at Taber Burned  
Lethbridge.—Fire caused by defective wiring destroyed the Ogilvie Milling Company's elevator and contents at Taber. The loss will run into thousands of dollars.

### BOLD POST

### OFFICE ROBBERY

PARCEL OF BANK MONEY AT WETASKIWIN MYSTERIOUSLY DISAPPEARS

Edmonton.—A special from Wetaskiwin, Alberta, says:

A bold robbery took place at the post office here when the door leading to the inner part of the building was forced open and a parcel of money removed.

The bundle, which contained some \$5,000, was in transit from Edmonton to the branch of the Royal Bank at Camrose, and was left on the ledge to be signed for by the mail clerk in the usual way. Another package of money in the safe, the cash in the tills and the stamps were not touched.

### German Government

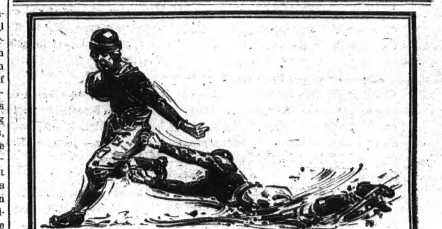

### Floating New Loan

Issue of \$50,000,000 Will Be in Foreign Currency

Berlin.—The law authorizing the issue of \$50,000,000 worth of treasury bills, which was given official publication, is believed to provide the first instance of a government floating an international loan quoted only in denominations of foreign money. The law signed by President Ebert makes no mention of the German mark, but says the treasury bills may be purchased in British, U.S., Swiss, Dutch, Swedish, Norwegian, Danish, Argentine, Spanish and Japanese currencies. French and Belgian francs are not included. The work of fixing the details and conditions surrounding issue of the bills is left to the discretion of the Ministry of Finance.

### THE EXPLANATION Nature placed the growth-promoting "vitamins" in the oil of the cod-fish—this explains why

**Scott's Emulsion** is so definite in its help to a child of any age. Latter-day science reveals that the "vitamins" are needful for normal growth. **Scott's Emulsion will help any child grow.**  
Scott & Bowne, Toronto, Ont.

## Help You Run the Ball

—bring home the bacon, collar the blue vase, carry the message to Garcia, etc.

LITTLE Raisins, full of energy and LITON, will put the pep into you that makes winning plays. Use vim like it in your business, too.

One hundred and forty-five calories of energizing nutriment in every little five-cent red box that you see.

Comes from fruit sugar in practically predigested form—LITON, the scientists call it—so it goes to work almost immediately. Rich in food iron also.

Try these little raisins when you're hungry, lazy, tired or faint. See how they pick you up and set you on your toes.

GOURLAY PIANO FOR SALE—In first-class condition. Apply to The Enterprise.

FOR IMMEDIATE CASH  
For Sale, Pair of Shetland Ponies, broke to ride or drive, ideal pets for children; also good buggy, sleigh or harness. Apply to M. Ricketts, Blairmore.

HOUSE, LOT AND FURNITURE  
FOR SALE. Includes handsome Circuflax Walnut Bedroom Suite. Also a Ford Truck in good condition. Apply to R. E. McNeill, State Street east, or Phone 245, Blairmore.

## NON-PROFESSIONAL HOCKEY

Hockey is not finished yet by any means, as far as Blairmore is concerned. Bills are now out announcing a real looking of horns tonight between teams from the West Canadian Collieries and the local banks. Just a peep at most of the would-be players as you see them in every day life will satisfy you as to the brand of stuff that will be handed out. We understand that every precaution is being taken for the protection of spectators and for the preservation of a life of the players. Even an ambulance will be on hand, accompanied by Arthur Shearer, Walter Lord, Dr. McDonald and Dr. Key, while representatives of every police force in the Dominion of Canada will help preserve order.

Representatives of the Associated Press arrived here this morning and accurate information regarding this game is assured the press of the world.

Tomorrow night the Scribes and Pharisees will enter into their annual combat. This go in the past has afforded no small measure of fun and provided the skating (or swimming) is good, excitement should reach its climax on this occasion.

See bills for lineup for the games.

## NOT A QUESTION OF FREIGHT RATES

No, dear friends, it is not a question of freight rates that is considered by the citizens of Hillcrest and Bellevue who feel like sending to points further away than Blairmore for their printing. It is merely lack of principle on the part of a very few individuals who fall for the "guff" thrustured upon them by others. They may not be aware that both time and money can be saved by dealing with The Enterprise.

## ANTEL IS ACQUITTED

Harry Antel, of Coleman, against whom a charge of theft was preferred by one Steve Farion, also of Coleman, was given a fair trial before Judge McDonald here last week and after a two-days' deliberation Antel was declared not guilty.

The case arose out of the reported disappearance of twenty-five cases of liquor. Farion stated that the liquor had been purchased by him from a party at Crows' Nest and that for the twenty-five cases he paid \$1360 cash. It was agreed at the time of purchase that the goods would be placed in a C. P. R. box car and unsealed would be transferred to the east end of Coleman siding. The car was noticed spotted as directed next day and later was moved to a point almost opposite the residence of Francesco Montini, an Italian of Bush Town, in whose house it had been arranged the goods were to be stored. That night Farion, all by his lonesome, escorted the booze, two sacks at a time, from the car to a closet in the Montini residence.

Next morning the Montinis reported to Farion that Antel and his French driver had come to the house and taken away the booze, claiming that the police were coming shortly and it had to be rushed out to save it. Francesco Montini and his five sons all testified to this effect. Farion also told the court of having given both Antel and his driver a "lickin", but evidence produced practically proved that others than Antel and his man were possibly victims of the assault. C. J. Ford of Calgary, defended Antel, while J. D. Matheson, K.C., of Macleod, represented the Crown.

The case aroused considerable interest, as it was doubted by all whether Antel could have been connected with such a deed. Witnesses called testified to the good character of Antel and their belief that he was not in any way connected with the affair.

Farion also stated on oath that he has on several occasions been charged under the liquor act and has been found guilty in some cases, and that his most recent fine was \$100 at Coleman in connection with the present case.

## JORDAY SPECIALS

Wagstaffe's Lemon Marmalade—  
Small Glass Jars, each ..... 35c  
4 lb tins, each ..... \$1.00

## T. Pondelicek &amp; Son

P.O. Box 188 BLAIRMORE Phone 79

As noted in press dispatches a few days ago, the Alberta government has given the contract for the printing of Alberta's school books, not to an Alberta firm, but to a Toronto establishment—and then people wonder why our citizens have to leave the province to look for work. The word "contract," by the way, is incorrectly used in this connection. An order for the printing of the books was given. A contract would imply that tenders had been asked for publicly, which was not the case—Ex.

A deputation of 250 never-touch-its (T) waited upon the provincial government last week to protest against a referendum being taken on the beer question. Every bootlegger in the province was perfectly in sympathy with the movement.

## TOWN OF BLAIRMORE

Applications are invited for the position of Legal Adviser to the Town of Blairmore for the year 1923. For particulars, etc., apply to F. WRIGHT, Secretary-Treasurer.

Prohibition is working splendidly in Alberta. The other day a young lad of twenty years received his paycheck for a fortnight's work. The net amount was sixty-three dollars—a fair wage for a lad of that age. He cashed that cheque and undertook to pay his bills. First he paid his "refreshment" bill, \$32 for two weeks; next his tobacco bill \$9.30 for the two weeks; next his lunches at the swellest cafe, \$12. The balance, \$10.59 was all that was left to meet his board and clothing bills. Under the old license system that boy's money would never have been invested in intoxicants and from his monthly wage of approximately \$120 he would have banked about half.
